eCardMax Installation

System Requirement

eCardMax will require the following for a successful installation:

PHP version 5.x or higher

MySQL 4.x or higher (5.x is recommended)

It can be run on any platform: UNIX, Linux, FreeBSD, and Windows.

PHP SAFE_MODE = OFF, this option is required to allow admin and or user to upload files via admin.

GD Library Extension for PHP

Step by Step Installation Instructions for eCardMAX

If you have basic knowledge of using FTP and are sure your hosting service or server will run eCardMAX 10.5 you can use these steps to quickly get started. Otherwise click [here](#) to learn the basic of WS-FTP program

1. Decompress the eCardMAX 10.5 archive to a local directory on your system.
2. Upload all the files contained in this archive (retaining the directory structure) to a web accessible directory on your server or hosting account.
3. Change the permissions on config.php + config2.php to be writeable by all (777 within your FTP Client). For more information about how to chmod 777 files and folders please come [here](#)
4. Using your web browser visit the location you placed eCardMAX 10.5 with the addition of install.php, e.g. <http://www.mydomain.com/greetings/install.php>
5. Follow the instruction on the welcome screen to chmod 777 other folders + files.
6. Click the link Go to next step to fill out all the requested information and hit Submit.
7. If you enter correct your MySQL account, eCardMAX 10.5 should now be available.

When you run script <http://www.mydomain.com/install.php> you will see this:

eCardMax 10.5

Welcome to eCardMax 10.5. Before you go to next step, please use FTP to chmod 777 list of files and folders below.

[Click here](#) to know how to use FTP to chmod 777 files and folder.

- chmod 777 file **config.php**
- chmod 777 file **config2.php**
- chmod 777 folder **admin/sql_backup**
- chmod 777 folder **admin/temp**
- chmod 777 folder **resource/invitation**
- chmod 777 folder **resource/music**
- chmod 777 folder **resource/picture**
- chmod 777 folder **resource/stamp**
- chmod 777 folder **resource/skin**
- chmod 777 folder **resource/picture/user_picture**
- chmod 777 folder **resource/invitation_fonts/user_font**
- chmod 777 folder **resource/richtedit/upload**
- chmod 777 file **resource/games/ephotohunt/count.txt + hiscore.txt + IP.log**
- chmod 777 file **resource/games/memory/count.txt + hiscore.txt + IP.log**

[Click here](#) to go next step

Follow the instruction on the screen to chmod 777 the list of files and folders, then click the link [Click here to go next step](#) - you will see the form below

Your site information

»Admin User Name ID

»Admin Password

»eCard URL

»eCard Root Path (eCardMAX will auto detect, if you see the text box field below is blank, then you have to fill out eCard Root Path) - [Click here](#) to find out eCard Root Path

»Database Server Host Name

»Database Name

»Database User Name

»Database Password

☐ Check to drop (delete) current eCardMax table if exists? (Use this in case you want to re-install eCardMax 10.5 - **warning your current data will be lost**)

If eCardMAX does not auto detect your eCard Root Path, then visit the link "click here to find out eCard Root Path" - a long page of configuration info will appear. To find out eCard Root Path, scroll down to find this:

Scroll down and find something like this:

Unix server: **/home/xxx/public_html/greetings/install.php**

Then eCard Root Path will be: **/home/xxx/public_html/greetings** (remove /install.php)

Window server: C:\wwwroot\greetings\install.php

Then eCard Root Path will be **C:/wwwroot/greetings** (You have to replace \ to / and remove /install.php)

PHP Version 5.3.16

Scroll Down

System	Linux ecardsart.ecardmax.com 2.6.18-128.el5 #1 SMP Tue Jan 22 16:24:03 EST 2013 i686
Build Date	Sep 14 2012 21:03:13

REQUEST_URI	/gold_package_10.5/install.php?step=phpinfo
SCRIPT_FILENAME	/home/xxxxxxx/public_html/gold_package_10.5/install.php
SCRIPT_NAME	/gold_package_10.5/install.php

eCard Root Path will be **/home/xxxxxxx/public_html/gold_package_10.5**

Fill out your MySQL account then click Submit button.

If your hosting company supports site Admin CPanel,
click [here](#) to see instruction how to create new MySQL account

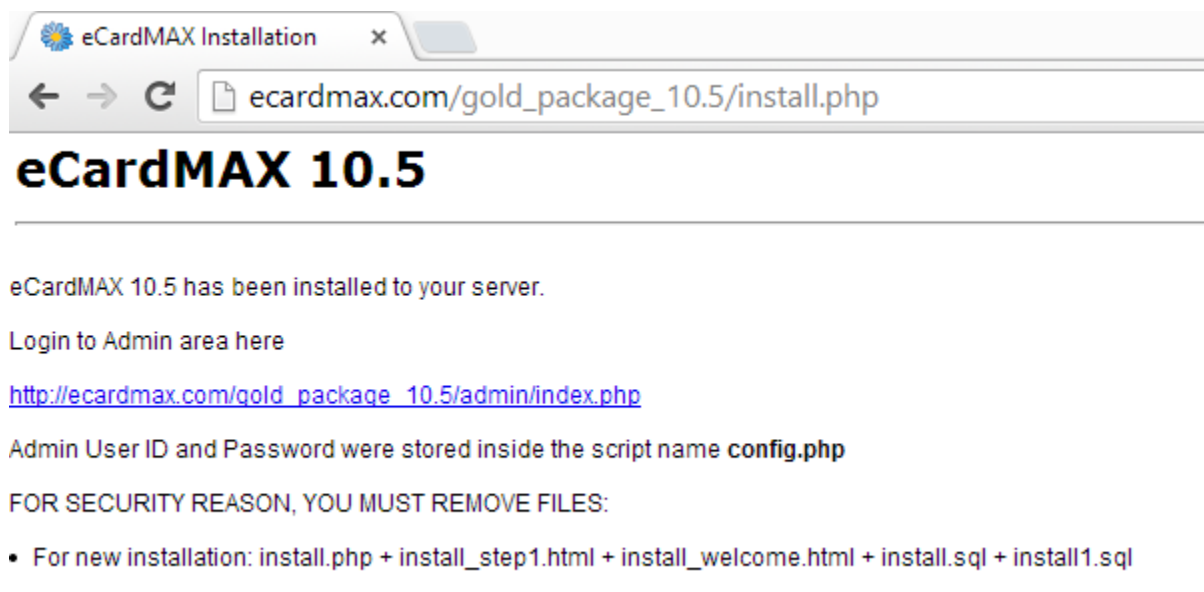

Copy/Convert MySQL table from eCardMAX 10 to eCardMAX 10.5

If you want to upgrade from eCardMAX 10 to eCardMAX 10.5, after you have copied all eCardMAX 10.5 files to your eCard site, you will need to run script upgrade.php, this program will copy/convert eCardMAX 10's tables to version 10.5. Remember backup current database before you do that.

This script comes with eCardMAX 10.5 zip file.

Post Installation Tasks

Once you have successfully installed eCardMAX, you will see the screen below. Please follow instruction on this screen to remove installation files. Leaving these files in place is a very serious potential security issue which may lead to deletion or alteration of files, etc. Please note that until these files are removed, eCardMAX will not operate and a warning message will be displayed.

For maximum security we recommend you should use .htaccess to protect directory greetings/admin

Setup Cron Job for Email Reminder Service

What is cron job (cron tab)?

Cron job is a UNIX command for scheduling jobs to be executed sometime in the future. A cron is normally used to schedule a job that is executed periodically - for example, to send out an email notice every month, year. It is also a daemon process, meaning that it runs continuously, waiting for specific events to occur.

If you are running Windows server, you will need to set a "Scheduled Task" to run file greetings/cronjob.php every day at 12:01am (or 2:00am - whenever you like)

Please note: You should rename file cronjob.php to xxzzyyuu.php (the filename likes a password) so that user can't run this file on their browser.

If your server supports cPanel, then the instruction how to set up cron job command below is for you

- Login to your cPanel by using this URL: <http://mydomain.com/cpanel>

- Click on icon Cron jobs, see image below

- Next screen - click Advanced (Unix Style) button

- Next screen - Input data below then click button Commit Changes

Minute : 2
Hour: 0
Day: *
Month: *
Weekday: *

Command:

```
cd '/home/path/to/greeting_folder/greetings/' ; php -q cronjob.php -p processqueue > /dev/null ;
```

You can copy the command code below

Top of Form

```
cd '/home/path/to/greeting_folder/greetings/' ; php -q cronjob.php -p processqueue > /dev/null ;
```

Bottom of Form

Replace /home/path/to/greeting_folder/greetings/ to your eCard Root path.

If you don't know what it is, you can look inside the script config.php, code

```
$ecard_root = "/xxx/xxx/xx/greetings";
```

Minute: 2 - Hour: 0 - Day: * - Month: * - Weekday: * means: your server will auto run the script <http://YOU.COM/greetings/cronjob.php> every day at 12:02 am (after midnight 2 minutes)

If you want to run the script cronjob.php every day at 3:30am then input like this:

Minute: 30 - Hour: 3 - Day: * - Month: * - Weekday: *

Setup .htaccess & .htpasswd to protect your admin directory (for cPanel user only)

If your hosting company supports site Admin cPanel, then follow step by step below to setup password to protect your admin directory

- Login to your cPanel by using this URL: <http://mydomain.com/cpanel>

- Click on icon Password Protect Directory, see image below

- Next screen you will see the list directory, browse to folder greetings/admin (Open a folder by clicking on its icon. Select the folder you wish to protect by clicking on its name.)

 LOGOUT

Password Protect Directories

Password protection allows you to require a username and password to access a folder within your site from the web. When password protecting a folder, there are a few things to remember. Protecting a folder will protect all folders within that folder. Also, you will need to create users who can access the protected directory. You can give the password protected directory any name, no matter what the actual directory is called.

Set permissions for /home/ecardmax/public_html/gold_package_10.5/admin

Security Settings:

When a user accesses the protected directory through the web, they will be prompted to enter a username and password. The name that you choose for the protect directory will appear as well.

Password protect this directory: ☒

Name the protected directory: 

Create User:

Username: 

New Password: 

Password (Again): 

Strength (why?): Very Strong (100/100)

Check the check box then click Save button - next screen click Go back link to go back to previous page - see image below

Create User:

Username:

New Password:

Password (Again):

Strength (why?):

Very Weak (0/100)

Password Generator

Add/modify authorized user

Authorized Users:

To change a user's password, add that user above with the new password.

Invitation Installation

This document will walk you through the basics on installing the add-on Invitation for eCardMAX 10 software.

Version: 10.5

1. Requirements

- 1) You are running eCardMAX 10.5

2. Quick Install

1. Decompress the Invitation 10.5 archive to a local directory on your system.
2. Upload all the files contained in this archive (retaining the directory structure) to eCardMAX 10.5 directory on your server or hosting account.
3. Using your web browser visit the location you placed eCardMAX 10.5 with the addition of install.php, e.g. <http://www.mydomain.com/greetings/install.php>

3. Important

Once you have successfully installed eCardMAX 10.5 you **MUST** ensure you remove /install.php. Leaving it in place is a very serious potential security issue which may lead to deletion or alteration of files, etc.

Value	Description
Webmaster email	All emails sent by the gallery will be sent using this email address. This must be a valid email address.
Your site title	Enter the name of your gallery in this text field. The name you enter will appear as the title that is displayed in the web browser's title bar and is also displayed in many of the different theme templates.
Currency symbol Please use UTF-8 encoding	used as a shorthand for a currency's name
Search Engine Friendly URL .htaccess is supported. You can use SEO URL now	You should also be concerned with user friendliness. URLs with long query strings are not only unfriendly to search engines, but also to users. A user will have a far easier time remembering a URL with real words in it rather than a URL with cryptic numeric data & variable names. Search engine friendly URLs also easily allow you to hide the type of server side programming you're using by removing the tell

	extension (such as .php) from your URLs. This means you will be able to change your backend software at a later date without changing your URLs, and it may even provide a security bonus.
Facebook link	The link of Facebook account or fanpage, it will be display in the right front page in Follow us line. For example https://www.facebook.com/ecardmax
Twitter link	The link of Twitter account, it will be display in the right front page in Follow us line. For example https://twitter.com/ecardmax
Pinterest link	The link of Pinterest account, it will be display in the right front page in Follow us line. For example https://www.pinterest.com/ecardmax/
Google+ link	The link of Google+ account, it will be display in the right front page in Follow us line. For example https://plus.google.com/+ecardmax
Support login with Facebook	Enable login with facebook account.
Facebook API key	API key of facebook when admin create new application for facebook login
Facebook secret	secret key of facebook when admin create new application for facebook login
When the receiver receives email notify to pickup ecard, what do you like to show in From Name and From Email field?	
If you select "Site's title and Site's email" then enter your site email address. Please note: For example if your domain is www.ecardmax.com , then Site Email Address should be something like this: info@ecardmax.com , service@ecardmax.com (end with your domain)	
Send email using SMTP server?	Send mail php function or smtp method.
Set meta tag Keyword for home page	The meta keywords tag allows you to provide additional text for crawler-based search engines to index along with your body copy.
Set meta tag Description for home page	The meta description tag allows you to influence the description of your page in the crawlers that support the tag.
Turn Horizontal banner	Yes: horizontal banner will be shown at front end. No: horizontal banner will be hidden at front end.
Turn Vertical banner	Yes: vertical banner will be shown at front end. No: vertical banner will be hidden at front end.

Allow users to give comment for ecard?	Comment with facebook account or email
Disable right click (use JavaScript) to prevent user copy your images?	<p>Yes: Disable right click on front end to prevent users from stealing website's images.</p> <p>No: accessing the right click menu, users can be used to copy and save the images.</p>
Enable Black list feature. User can subscribe their email to this list and never receive any email from your site again.	<p>To secure your site against spammers enable the feature.</p> <p>Yes: enable the feature.</p> <p>No: disable the feature.</p> <p>Today, most people on the internet have dynamic IP addresses that are assigned to them when connecting to the internet by their Internet Service Provider. These IP addresses change each time the user connects to the internet, but during an internet session these IP addresses are "visible" at the web-sites that the user is surfing. Within the range of all IP addresses (0.0.0.0 to 255.255.255.255), certain ranges are reserved for special purposes (mostly for the use on private networks). The banning feature will not accept IP addresses banning of addresses that belong to these private ranges (e.g. 192.168.0.1). This is necessary to prevent unexperienced, as well as experienced, eCardMax admin from banning IP addresses within their own LAN. If you're actually running eCardMax on your LAN/WAN that uses private IP addresses (e.g. on a company's intranet) and you want the authority to be able to ban users, switch this option to "Yes". If you're running eCardMax on a web server located in the internet (e.g. you're web hosted), you should keep this option set to "No".</p> <p>If you don't use banning at all, you can safely ignore this setting completely.</p>
Show Verify Image Code when user sign up new account?	<i>This function only works when GD library is supported by your server. Please turn off if GD is not supported.</i>
Use easy edit template feature.	<p>Yes: Select yes, program will print on the screen this image . Click on this image will tell you which html file name you need to edit (helpful while you design your site), select No to turn this feature off or when you go live your site</p> <p>No: Select no, program won't print that image.</p>
Date format	<p>This is the format of the outputted date string. See the formatting options below:</p> <p>DD MM YYYY</p>

	MM DD YYYY YYYY DD MM YYYY MM DD
Set server Time Zone	Specify the time zone difference between your local time and the time zone your web server is in. This value will be used to adjust time stamps in eCards and other places.
Number of thumbnail images per row	This sets the maximum images of the thumbnails that are to be displayed for each row. Default value is 3 this means that each row will show 3 thumbnails.
Number of row per page	This sets the maximum row of the thumbnails that are to be displayed for each page. Default value is 3.
HotEditor Key code	Enter keycode to remove link back to HotEditor site
eCardMAX Key code	Enter keycode to remove link back to eCardMAX site.
ePhotoHunt Game Key code	Enter keycode to remove link back to ePhotoHunt site.
eCardMAX Java Applet Key code	Enter keycode to remove link back to eCardMAX site.
DSEffect Key code (visit their website to buy Key code)	
Anfy Key code (visit their website to buy Key code)	

⇒ Change currency symbol: you can change currency symbol of ecards.

Watermark Settings

Administration => System Configuration => Watermark Settings

1. Webmaster position

Determines where the watermark is supposed to be displayed on each picture. Possible options are:

- Bottom right
- Bottom left
- Up right
- Up left
- Center

2. Webmaster Opacity

Determines the transparency level for the watermark. By setting transparency you can make your image blend nicely into the pictures you upload that get watermarked.

View Black List Email

To help you manage your list email that you don't want to send mail when someone use it on your website, there is a black list email manager available - just click on the corresponding link in the admin menu.

Administration => View Black List Email

All collectors in this black list are added by administrator of the site. In here, administrator can delete or set status for any users.

- All emails found in this list which were marked Active will be blocked. System will not send any email message or ecard to them.
- Emails which were marked Pending will not be blocked.
- If users don't want to receive any email from your site, they can add their email to this list (via user interface). Admin can add/remove their email here.

 **View Black List Email (Total 6)**

 [Click here to add new email to black list](#)

Notes:

- All emails found in this list which were marked **Active** will be blocked. System will not send any email message or ecard to them.
- Emails which were marked **Pending** will not be blocked.
- If users don't want to receive any email from your site, they can add their email to this list (via user interface). Admin can add/remove their email here.

Icon	Email	More Info	Status	Remove	
	capulet_som@yahoo.com	Active Server will not send anything to this email	Active		<input type="checkbox"/>

Add new email to black list 

Enter email address line by line

Ban User IP/Email

Ban users based on hostname or IP address. Make sure not to ban yourself! Use this feature with extreme caution, as most users today do not have static IP addresses, this feature should only be employed if you really know what you're doing.

Click on the corresponding link in the admin menu.

Administration => View Black List Email

A screenshot of the 'Ban IP/Email (Total 1)' page. The page has a yellow header with the title 'Ban IP/Email (Total 1)' and a plus icon. Below the header is a grey bar with a green plus icon and the text 'Click here to add new IP/Email to ban list'. Underneath is a 'Tips:' section with two bullet points: 'Ban IP Address: will prevent a user reaching any part of your ecard site.' and 'Ban Email Address: will prevent a user sign up new account or send ecard by using that email.' Below the tips is a table with columns: 'Icon', 'IP/Email', 'Length of ban (MM/DD/YYYY)', and 'UnBan'. The table contains one row with an IP icon, the IP address '255.20.20.2', a reason 'Reason: Spam', a date '10/29/2027', and an 'UnBan' checkbox. At the bottom of the table is a search bar with the text 'Search IP/Email' and a 'Search' button. To the left of the search bar is a 'Display row per page' dropdown set to '15'. To the right of the search bar is an 'Unban Selected' button and an upward arrow icon.

You can add new IP/Email to ban list by clicking “Click here to add new IP/Email to ban list” and fill in the form that will come up.

 **Ban IP/Email (Total 1)**

[Click here to add new IP/Email to ban list](#)

Add new IP/Email to ban list 

Enter an IP or Email address
(Line by line)

Example:
111.222.*.*
myname@email.com
117.6.44.73

255.20.20.2

Length of ban: Forever 

Reason for ban: Spam

[Submit](#)

Tips:

- **Ban IP Address:** will prevent a user reaching any part of your ecard site.
- **Ban Email Address:** will prevent a user sign up new account or send ecard by using that email.

eCardMax stores files inside of albums, so you'll need at least one album for your pictures/files to be placed in. Albums can be stored in categories (but they don't HAVE to be in a category, they can just as well go into the eCardMax "root").

When you click on "albums" in the members menu, you will see the Album Manager.

Members => View Member Album

There is a menu displayed next to album:

- Show member photos: allows you to view or delete photos.
- Show member audio files: allows you to view or delete audio files.
- Show member poems: allows you to view or delete poems.

 **Show Member Photos (total: 27)**

Click “Click here to add/remove ecard in this category[]” to display the screen below.

Add/Remove eCards (Total 13) - Category name **General**

Select who can/can't send ALL ecards in this category

Set price for all cards in this category

Click here to add new eCards

Sort	Thumbnail	<input checked="" type="checkbox"/>	Embed Msg		Select who can send ecard										Delete	<input type="checkbox"/>
1	 Added on date: Mar 17 2006	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/> Guest <input checked="" type="checkbox"/> Free Basic membership <input type="checkbox"/> Gold Membership - Re-bill every year Pay Per Card: \$0.00											<input type="checkbox"/>
2		<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/> Guest											<input type="checkbox"/>

The screen above displays detail of each ecard. In here, you may add your own ecard or remove existing ecard.

To add new ecard, click and you will see the screen below:

How to add new eCards by using FTP program?

- Use FTP login to your server, go inside folder
/home/ecardmax/public_html/gold_package_10.5/resource/picture/Birthday
- Start uploading thumbnail + full size image files to folder **Birthday**. You must name your thumbnail and full size image files like this:

 thumbnail : **xxx_thumb.gif** (or .jpg, .png) - example: **1_thumb.gif**
 full size: **xxx.gif** (or .jpg, .png, .swf, .mp4) - example: **1.swf** (flash ecard)

Please Note: If you don't have your thumbnail images ready then just upload full size images (example: 123.jpg), eCardMAX will auto create Thumbnails for you (it will create 123_thumb.jpg). (eCardMAX **will not** create thumbnail if full size card is a flash movie .swf). To set thumbnail width and height, use **System Configuration**
- After you're done uploading your files, [CLICK HERE](#) to insert your new ecards to database.

Add new eCards using web browser

Note: eCardMAX will auto create thumbnails for you if you don't input thumbnail files.

Thumbnail 1	Choose File No file chosen	(allow xxx_thumb.gif or .jpg or .png)
Fullsize 1	Choose File No file chosen	(allow xxx.gif or .jpg or .png or .swf or .mp4)
Thumbnail 2	Choose File No file chosen	(allow xxx_thumb.gif or .jpg or .png)
Fullsize 2	Choose File No file chosen	(allow xxx.gif or .jpg or .png or .swf or .mp4)
Thumbnail 3	Choose File No file chosen	(allow xxx_thumb.gif or .jpg or .png)
Fullsize 3	Choose File No file chosen	(allow xxx.gif or .jpg or .png or .swf or .mp4)
Thumbnail 4	Choose File No file chosen	(allow xxx_thumb.gif or .jpg or .png)
Fullsize 4	Choose File No file chosen	(allow xxx.gif or .jpg or .png or .swf or .mp4)
Thumbnail 5	Choose File No file chosen	(allow xxx_thumb.gif or .jpg or .png)
Fullsize 5	Choose File No file chosen	(allow xxx.gif or .jpg or .png or .swf or .mp4)
Thumbnail 6	Choose File No file chosen	(allow xxx_thumb.gif or .jpg or .png)
Fullsize 6	Choose File No file chosen	(allow xxx.gif or .jpg or .png or .swf or .mp4)
Thumbnail 7	Choose File No file chosen	(allow xxx_thumb.gif or .jpg or .png)
Fullsize 7	Choose File No file chosen	(allow xxx.gif or .jpg or .png or .swf or .mp4)
Submit		

You may add ecard(s) via admin by click the Browse button and choose thumbnail image and full-size image or you may leave the thumbnail image blank and eCardMax will auto generate the thumbnail image for you base on the thumbnail image size setting under System Configuration.

If you have many ecards to upload at once, you may do so via FTP by following the instruction step 1-3 at the top of the above screen.

eCardMAX supports youtube video as a ecards

Add youtube video as ecard	
Youtube link 1	<input type="text"/> Only Youtube link as http://www.youtube.com/watch?v=G_crTZ5aVKc
Youtube link 2	<input type="text"/> Only Youtube link as http://www.youtube.com/watch?v=G_crTZ5aVKc
Youtube link 3	<input type="text"/> Only Youtube link as http://www.youtube.com/watch?v=G_crTZ5aVKc
<input type="button" value="Submit"/>	

After ecard is added you may configure all options for it. By moving your mouse over to each icon in the column header below, you will see description for each item.

Sort	Thumbnail		Embed Msg		Select who can send ecard										Delete	<input type="checkbox"/>
1	 Added on date: Mar 17 2006	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/> Guest <input checked="" type="checkbox"/> Free Basic membership <input type="checkbox"/> Gold Membership - Re-bill every year Pay Per Card: \$0.00											<input type="checkbox"/>

Sort – Set the order of ecard display on the front-end

Thumbnail – Shows the thumbnail image of ecard and date added

- Feature ecard, when this is checked, it will show this ecard in the featured ecard section on the front-end

Embed Msg – This is for Flash ecard, if you want to allow user to embed the message when personalize the card to display in your flash ecard, check this checkbox. Additional programming will require for each flash ecard that allows embed message, will require knowledge of flash programming.

Select who can send ecard – This displays different membership groups, if you allow each group to send ecard then check the appropriate box. For Guest and Free Basic Membership groups, if you want either of this group to send this card you will also need to turn on the feature *Allow users in this group to send ecard* in the Members, Set Member Groups section.

- Click on this icon to enter caption for the ecard which will be displayed under ecard thumbnail on front-end.

- Click on this icon to enter keywords separated by comma, these keywords will be utilized by search engines.

- Click on this icon to enter detail description for this ecard.

- Click this icon to set the default poem for this ecard.

- Click this icon to set default java effect for this ecard. This option will only work for image type ecard only; it will not work for flash ecard. For animated gif ecard, if you use this option then you will lose the gif animation.

- Click this icon to set default skin for this ecard.

- Click this icon to set default stamp for this ecard.

- Click this icon to set default music for this ecard.

- Click this icon to preview this ecard.

- Click this icon to delete this ecard.

- Click this icon to apply action to multiple ecards. The action list is available at the bottom of add/remove ecard screen as shown below.

Copy ecard(s) from one category to another category

- Step 1: Click on this link “Click here to add/remove ecard in this category”

General 0 13 6

Select command below:

Create new Sub category: Main Root >> Birthday >> ???

Click here to edit HTML Meta tag Keyword, Description and Title for this category [Birthday]

Integration with 2Checkout and Paypal

How to integrate eCardMAX to 2CheckOut payment processor

If you don't have 2CheckOut.com account, then click here to get one (No Waiting Weeks, Start Selling in just a Few Minutes - that's true).

First, you need to enable payment feature: Log in to eCardMAX Admin area, click the link System Configuration - go to section Gold version only, then answer Yes for question "Would you like to enable 2CheckOut and PayPal payment?"

You have to rename the script 2checkout.php. For example: rename it to Abnd2543Ps.php (it likes the password - hard to guess and you don't have to remember it). Please do not modify the php code inside unless you know what you are doing.

Next, click the link below to login to your 2Checkout.com member area

<https://www.2checkout.com/2co/login>

At the main page select the link Set Up Product

Account Homepage

Welcome to your sellers configuration area!

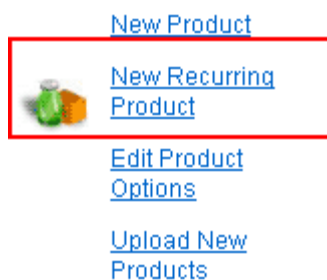

First time here, be sure to look at the following.

No matter what you want to sell, start by setting up your...

1. [Bank Account & Payment Details.](#)
2. [Additional Site Information.](#)
3. [Vendor Contact Information](#)
4. [Set Up Products.](#)
5. [Shipping Methods](#) or [e-good allowable countries.](#)
6. [Business Contact Information.](#)
7. [Setting Up Your Site.](#)

Always be sure to keep your information up to date.

Next page - click the link on your right hand side New Recurring Product.

Then fill out the form - See image below

Name (no special characters): Name as it will appear on receipt.	<input type="text" value="Membership greeting card"/> ?
Your Product ID:	<input type="text" value="Test 2CO"/> ?
Short Description: Displays at checkout.	<input type="text" value=""/> ?
Long Description: Displays on product page.	<div><div>Membership greeting card</div><div></div></div> ?
Price: (\$)	<input type="text" value="10.00"/> ?
Start Up Fee:	<input type="text" value=""/> ?
Weight: (lbs)	<input type="text" value=""/> ?
Handling:	<input type="text" value="0.00"/> ?
Tangible: ?	<input type="radio"/> Yes <input checked="" type="radio"/> No
Pending URL:	<input type="text" value=""/>
Approved URL:	<input type="text" value="http://YOU.COM/greetings/Abnd2543Ps.php"/>
Recurrence: ?	Bills every <input type="text" value="1"/> <input type="button" value="Year"/>
Duration: ?	Continue Billing for <input type="text" value="1"/> <input type="button" value="Year"/>
Product Complete ?	<input checked="" type="radio"/> Yes <input type="radio"/> No (Approves/Disapproves product for shopping center inclusion)

Enter the URL of script Abnd2543Ps.php in field Approved URL.

Click Create Recurring Product button when you done, then go back to Set Up Products page you will see this

Next page, select Yes for Direct Return, then enter the URL of script Abnd2543Ps.php

Direct Return

If set to Yes buyers will be immediately directed to your URLs below once they click the Complete Order button. If set to No the buyers will have to click a button to return to your URLs below.

Yes ▼

Note: You MUST get your passbacks working with direct return turned OFF before we will help you with a problem with direct return turned ON.

Approved, pending and affiliate area

Approved URL

Input a url for your customers to be sent to on a successful purchase.

http://YOU.COM/greetings/Abnd2543Ps.php

Example: <https://www.yoursite.com/yourscript.php>

Pending URL

Input a url for your customers to be sent to when a purchase cannot be verified immediately.

Example: <https://www.yoursite.com/yourscript.php>

Scroll down to set your Secret Word, then click Save Changes button

Now, login to eCardMAX admin area, scroll down to bottom page, at section Gold version only enter your 2CheckOut secret word, your 2CheckOut sid number (seller ID number) and your 2CheckOut product_id number.

To test 2CheckOut payment script, answer Yes for question Would you like to turn ON 2CHECKOUT TEST MODE?

Go to your eCardMAX homepage, click button Join Now to test 2CheckOut payment script. Use credit card number 123456789112345 to make the payment.

When you go live your site you MUST turn OFF 2CheckOut Test Mode (say No for question Would you like to turn ON 2CHECKOUT TEST MODE?)

How to integrate eCardMAX to PayPal payment processor

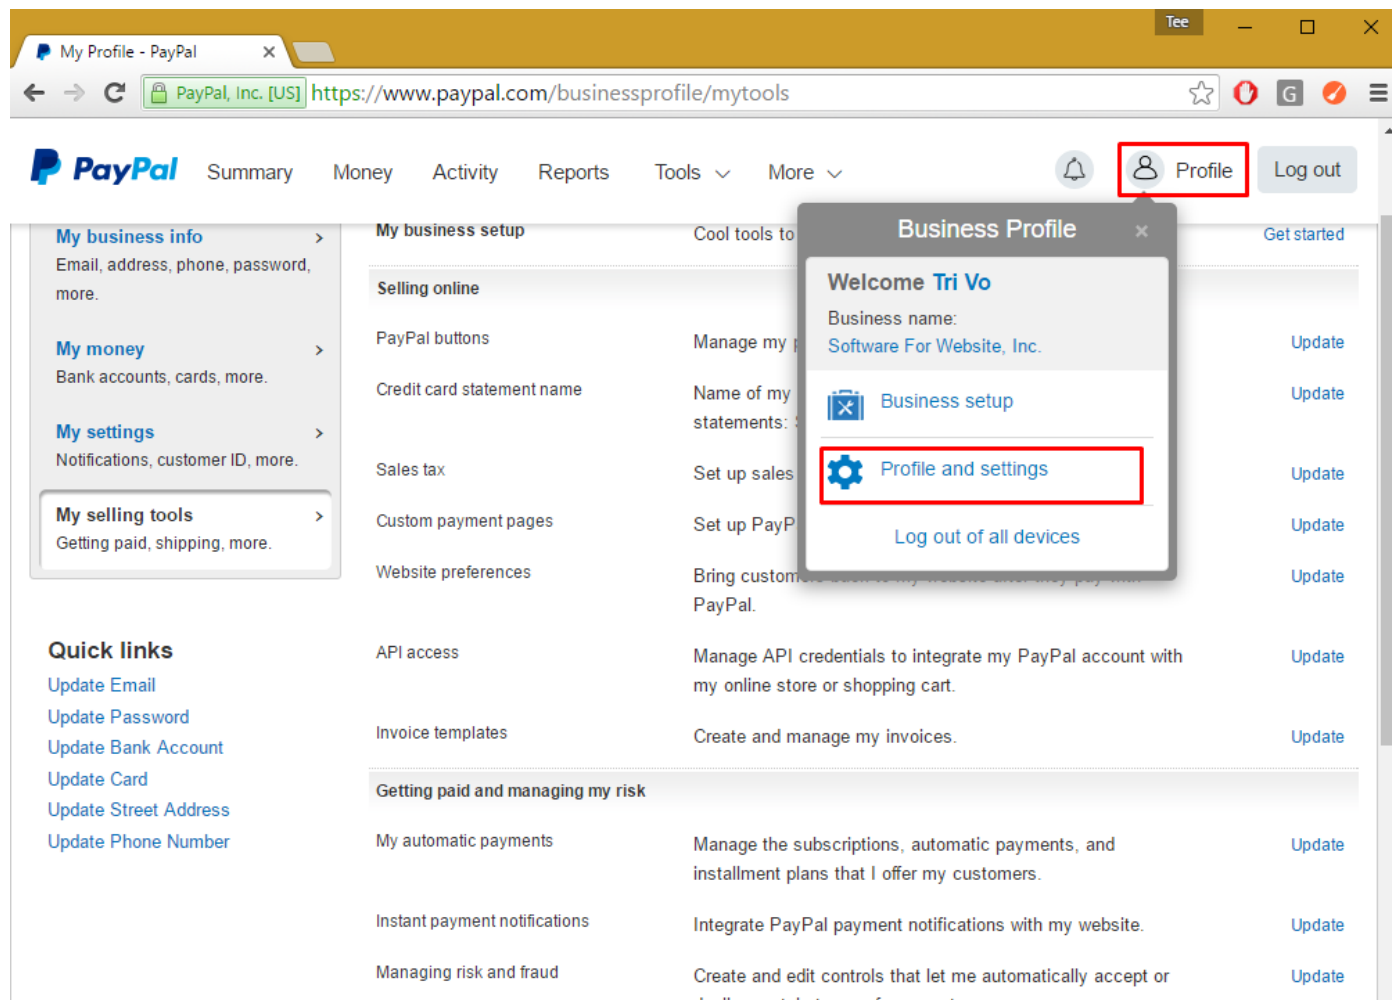

If you don't have PayPal.com account then click here to get one. Please note: You have to become a PayPal verified member in order to sell product on your site.

First, you need to enable payment feature: Log in to eCardMAX Admin area, click the link System Configuration - go to section Gold version only, then answer Yes for question "Would you like to enable 2Checkout and PayPal payment?"

Then, enter Your primary PayPal email address

Please note: If you have 2 or more Paypal email accounts then you have to use your Primary PayPal email account. To know which email account is your primary account then do this:

- Login to your PayPal member area
- Click "My Account" tab then click the link Instant "Profile"

Next page you have to click “My selling tools”, then “Update” Instant payment notifications

My business info Email, address, phone and more.	eBay ID	Link my eBay ID to my PayPal account.	Update
My money Banks, credit/debit cards and more.	Selling online

	Instant payment notifications	Integrate PayPal payment notifications with my website.	Update
	Block payments	Limit payments, add instructions, and more.	Update

Instant Payment Notification (IPN)

[Back to My Profile](#)

Instant Payment Notification (IPN) is a PayPal feature that sends messages about payments (and other transactional events) directly from PayPal to your website(s)' back-end systems. You can view up to 28 days worth of messages. You can also:

- Resend messages not received by your website(s)' back-end systems
- Temporarily stop receiving messages (useful when performing maintenance on your back-end systems)

Messages are generated but stored at PayPal until you start receiving them again.

Use the IPN feature in these situations:

- Your service provider, cart provider or website developer has asked you to
- You have back-end systems that require IPN messages to automate business processes, such as creating shipping notifications and inputs to accounting applications.

[Learn more](#) about the IPN feature.

To start or stop receiving IPN messages and to decide where to send them, click the **Choose IPN Settings** button.

[Choose IPN Settings](#)

And then you have to check Receive IPN messages (Enabled) and enter the URL of your paypal.php script - click Save button when you done. **Make sure the domain name and location of paypal.php file is where you have installed eCardMax. The screen below is used as an example only.**

Edit Instant Payment Notification (IPN) settings

[Back to My Profile](#)

PayPal sends IPN messages to the URL that you specify below.

To start receiving IPN messages, enter the notification URL and select **Receive IPN messages** below. To temporarily stop receiving IPN messages, select **Do not receive IPN messages** below. PayPal continues to generate and store IPN messages until you select **Receive IPN messages** again (or turn off IPN).

Notification URL

IPN messages

☒ Receive IPN messages (Enabled)

☐ Do not receive IPN messages (Disabled)

After entering URL for IPN, select Receive IPN messages then click Save button and it will take to screen below to confirm your IPN change is completed. You can always copy the Notification URL and test it in a browser to make sure you have entered a correct URL. If it is correct then result will be blank page.

[My Account](#)[Send Money](#)[Request Money](#)[Merchant Services](#)[Products & Services](#)

Instant Payment Notification (IPN)

[Back to Profile Summary](#)

You have turned on the IPN feature. You can view your IPNs on the [IPN History page](#). If necessary, you can resend IPN messages from that page. For more information on using and troubleshooting this feature, read more about [Instant Payment Notification \(IPN\)](#).

To stop receiving IPNs permanently, click **Turn Off IPN**.

Payment Receiving Preferences

[Back to My Profile](#)

Note: If you are using IPN, you must update your scripts to handle payments in currencies other than U.S. Dollars. [Learn More](#)

Allow payments sent to me in a currency I do not hold:

- ☐ Yes, accept and convert them to U.S. Dollars. [Additional charges apply.](#)
- ☐ No, deny the payments
- ☒ Ask Me, decide accepting or denying each individual payment

Block accidental payments:

You may prevent accidental payments by blocking duplicate invoice IDs

- ☒ Yes, block multiple payments per invoice ID
- ☐ No, allow multiple payments per invoice ID

Block payments from users who:

- ☐ Initiate payments from the Pay Anyone subtab of the Send Money tab

(If checked, you may enter an Alternate Payment URL for your buyers.)

Alternate Payment URL: [?](#)

(optional)

Block the following payments:

- ☐ Pay with eCheck or German bank transfer for all website payments except eBay. **NOTE:** You may not block eCheck payments on eBay.

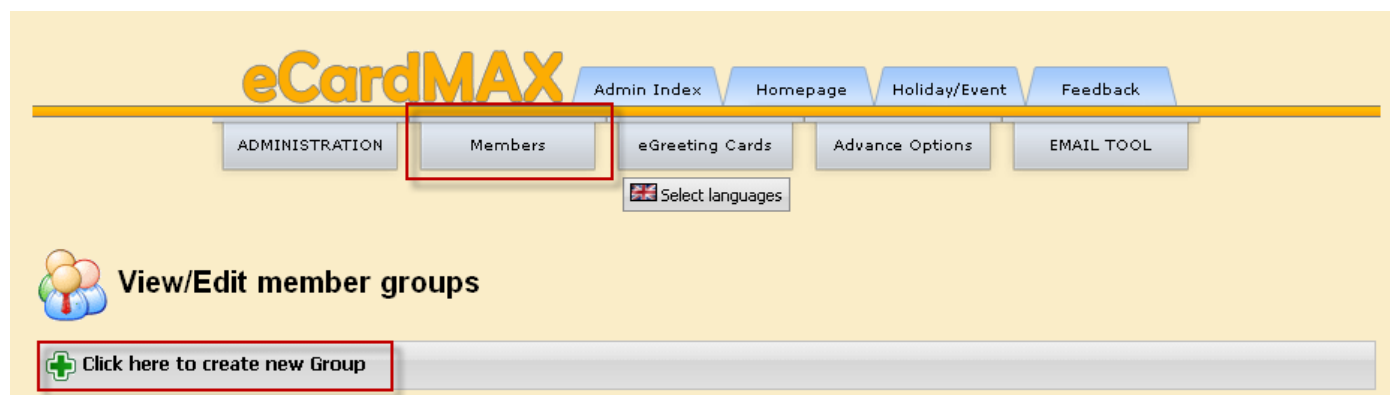

Block payments from Student account users under 18 years old:

- ☐ Yes
- ☒ No, allow payments from all Student account users

Display "Add Instructions to Seller" text input field:

- ☒ Yes
- ☐ No

Next

Then open app created

The screenshot shows the Facebook Developer Dashboard for the application 'ecardmax-105'. The top navigation bar includes links for Developers, Apps, Products, Docs, Tools, and Support, along with a search bar. The left sidebar contains a list of navigation items: Dashboard, Settings, Status & Review, App Details, Roles, Open Graph, Alerts, Localize, Canvas Payments, Audience Network, Test Apps, and Insights. A dropdown menu is open under the 'Apps' tab, showing a list of applications including 'eCardMax_gold_10', 'ecardmax-105' (which is highlighted), 'ECardMax Login', 'Timolden', 'Văn hóa xứ Quảng', 'GiveLove2U', 'ecardmax 10.5 demo', 'MocDesign', and 'ECardMAX'. The main content area displays the app's name 'ecardmax-105' with a status indicator 'This app is in development mode [?]'. Below this, the 'App ID' is shown as '275382739327829' and the 'App Secret' is represented by a series of dots, with a 'Show' button next to it. A 'Getting Started' button is also visible. The 'Facebook Login' section is partially visible, showing 'Active Login Users' and a 'Trend' graph. The URL at the bottom of the page is 'v/apps/275382739327829/dashboard/'.

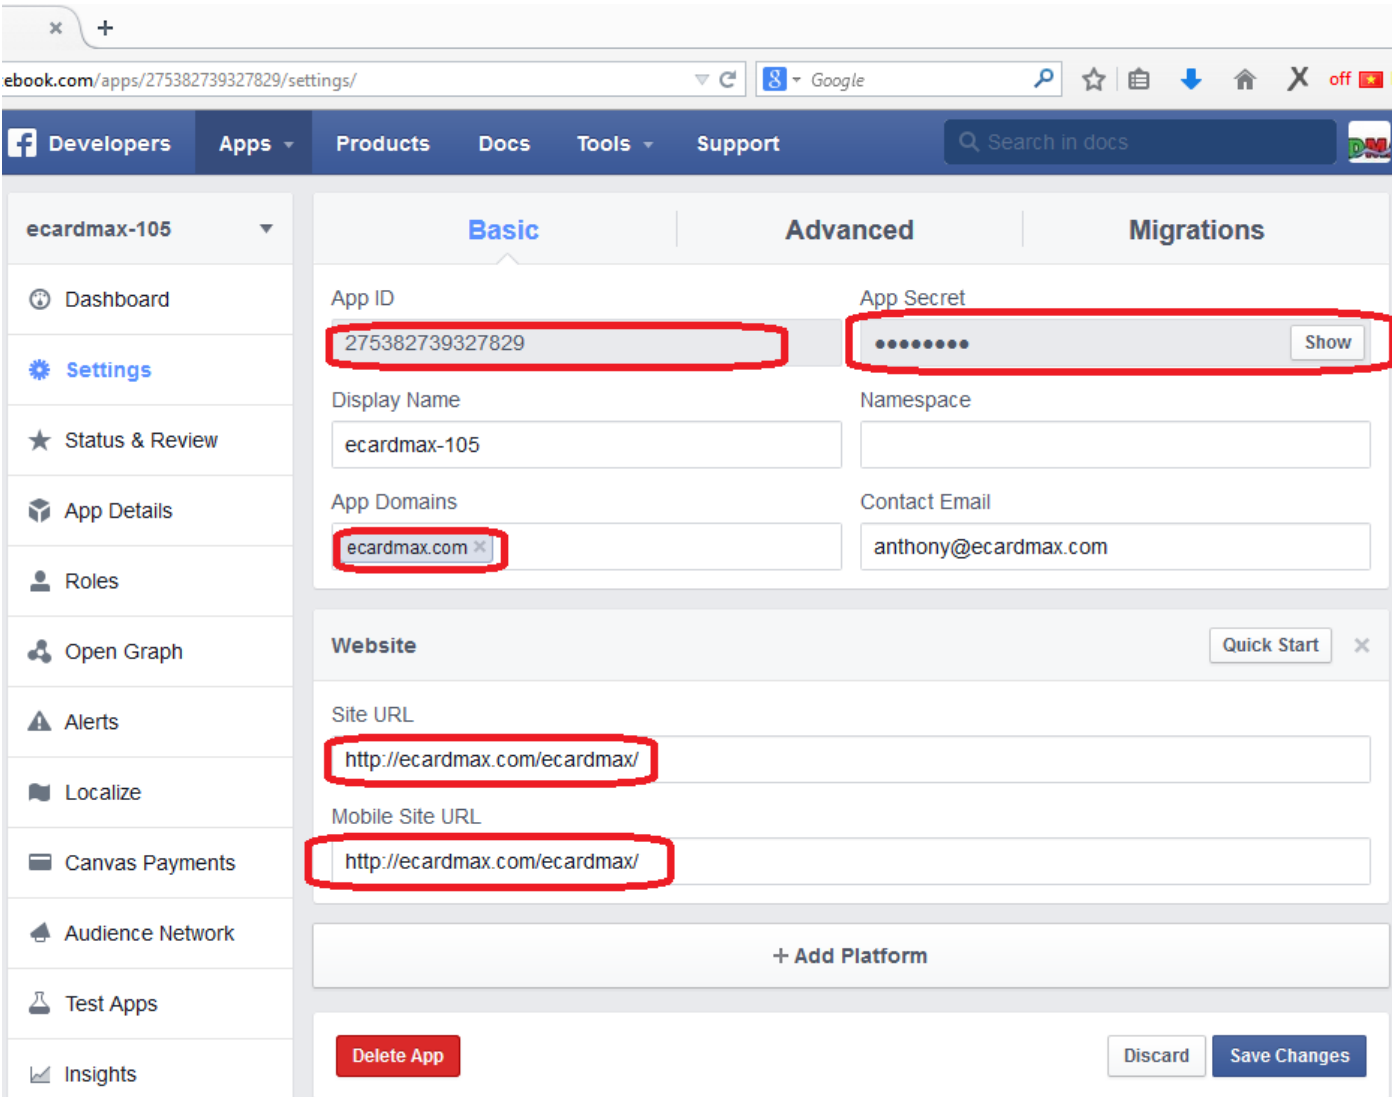

Then get facebook app ID & secret

The screenshot shows the Facebook Developer Dashboard for the application 'ecardmax-105'. The browser address bar shows 'ebook.com/apps/275382739327829/dashboard/'. The left sidebar contains a menu with items: Dashboard, Settings, Status & Review, App Details, Roles, Open Graph, Alerts, Localize, Canvas Payments, Audience Network, Test Apps, and Insights. The main content area is titled 'Dashboard' and features the app's logo, name 'ecardmax-105', and a note 'This app is in development mode [?]'. Below this, the 'App ID' is displayed as '275382739327829' (highlighted with a red box), and the 'App Secret' is shown as a series of dots with a 'Show' button (also highlighted with a red box). A 'Getting Started' section provides links to quickstart guides for various platforms. At the bottom, there is a 'Facebook Login' section with a chart for 'Active Login Users' and tabs for 'Monthly Active Users', 'Weekly Active Users', and 'Daily Active Users'.

Open ecardmax admin area, fill App ID & secret you get.

Page 116 of 123

To check your app is setup successful, please click Status & Review in left menu to see this

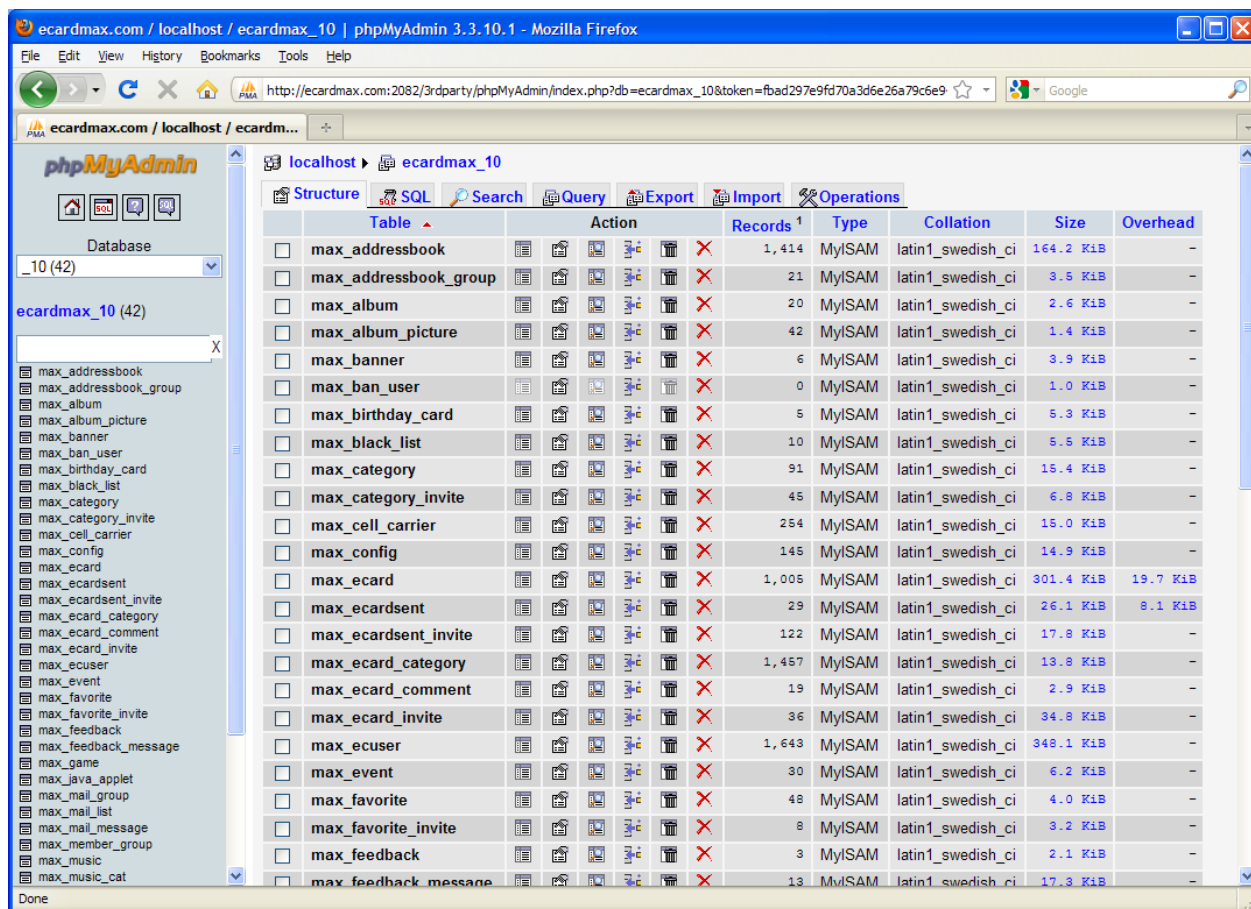

The screenshot displays the Facebook Developers interface for the app 'ecardmax-105'. The left sidebar contains navigation links: Developers, My Apps, Products, Docs, Tools & Support, News, Dashboard, Settings, Status & Review (active), App Details, Roles, Open Graph, Alerts, Localize, Canvas Payments, Audience Network, and Test Apps. The main content area is titled 'Status' and 'Items in Review'. It features the app's icon, name, and a question: 'Do you want to make this app and all its live features available to the general public?' with a 'YES' button. Below this is the 'Submit Items for Approval' section, which includes a 'Start a Submission' button. The 'Approved Items' section lists 'LOGIN PERMISSIONS': 'email' (Provides access to the person's primary email address. This permission is approved by default.) and 'public_profile' (Provides access to a person's basic information, including first name, last name, profile picture, gender and age range. This permission is approved by default.).

How to Back Up and Restore Database with phpMyAdmin

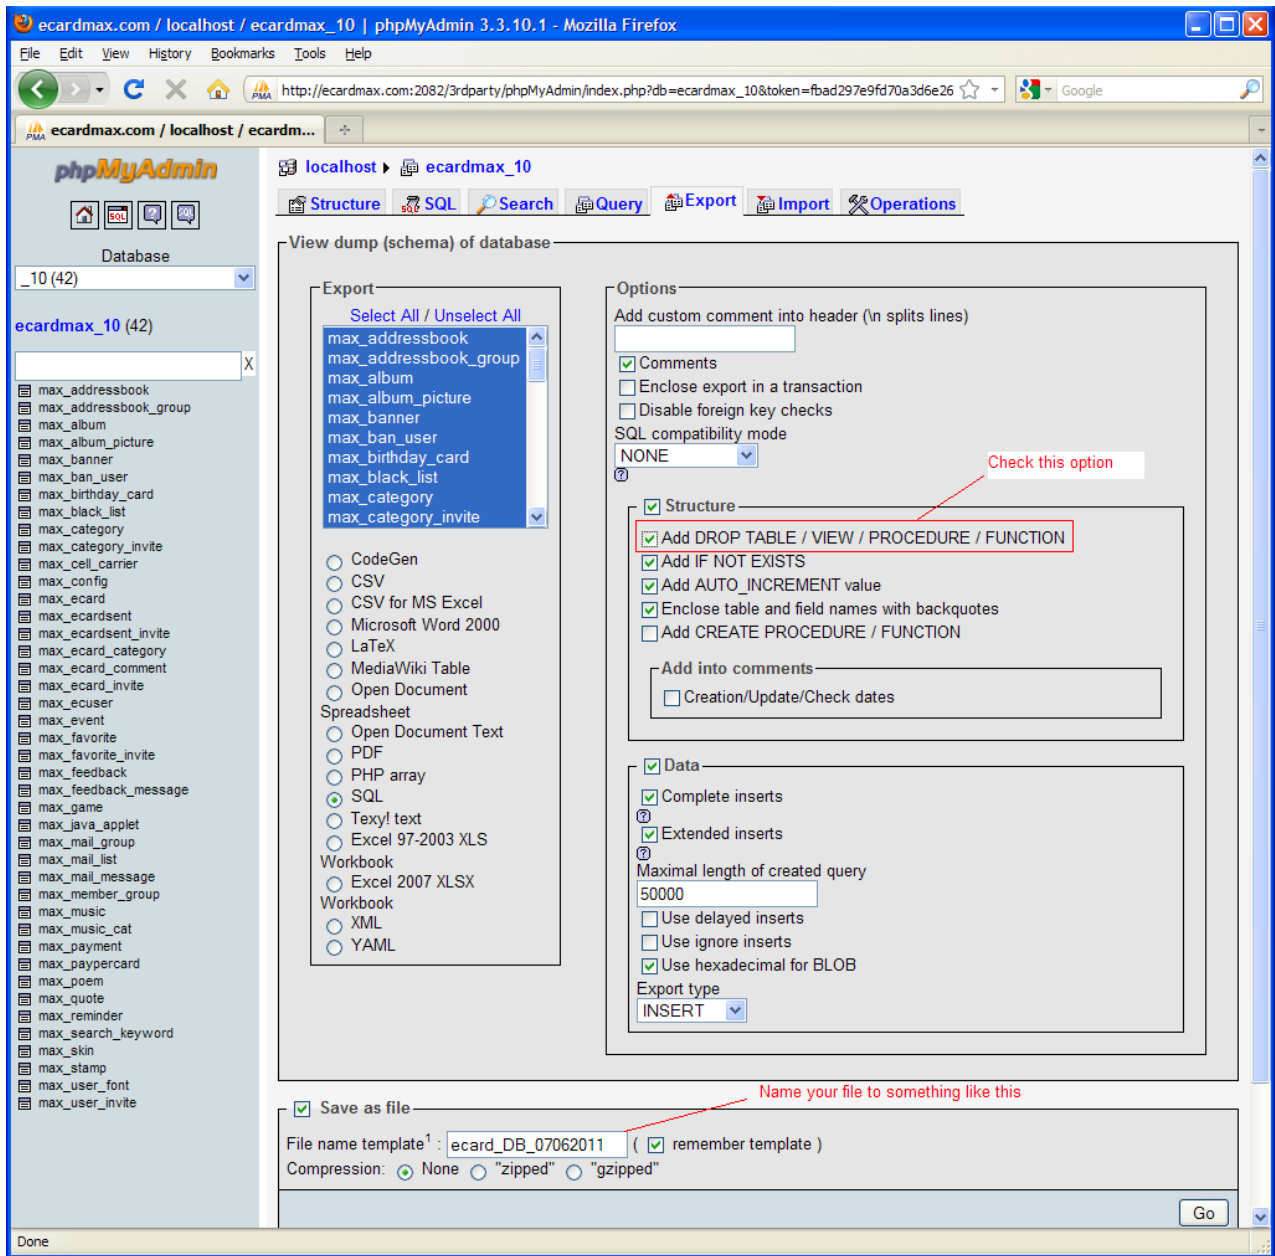

How to Back Up Database with phpMyAdmin

This section describes how to back up your eCardMax database with phpMyAdmin.

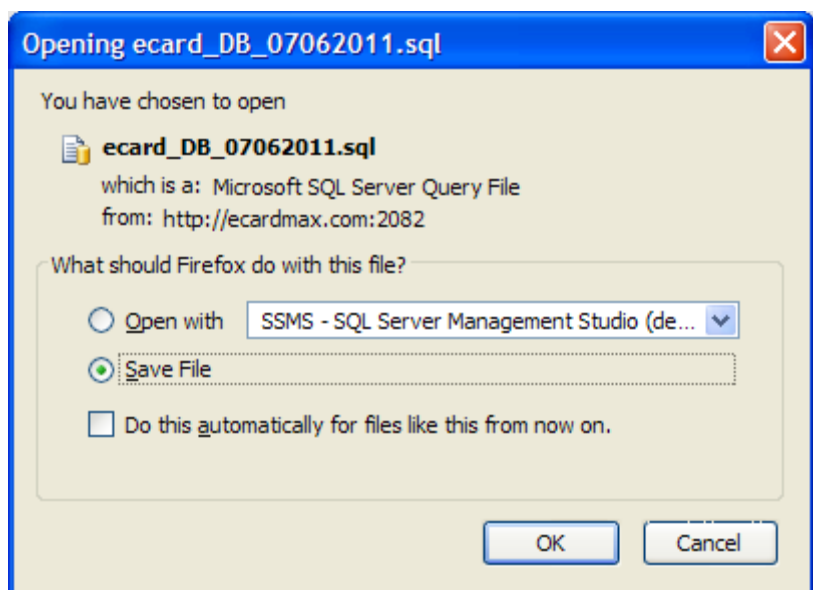

- 1) Launch phpMyAdmin via cPanel, if you are not use cPanel, then make sure you have phpMyAdmin installed and just run it. If you do not know if phpMyAdmin is installed on your web server then contact your hosting provider for support. The screen below shows phpMyAdmin with ecardmax_10 database selected.

2) Click on Export link at top and it will take you to the screen below.

Follow red color instruction on the screen above after that click Go and the screen below will popup.

- 3) Choose Save File and clicks OK button to save it. You will need to specify which folder you want to save it in. Normally, I just create a backup folder on your computer and put it there.

3.

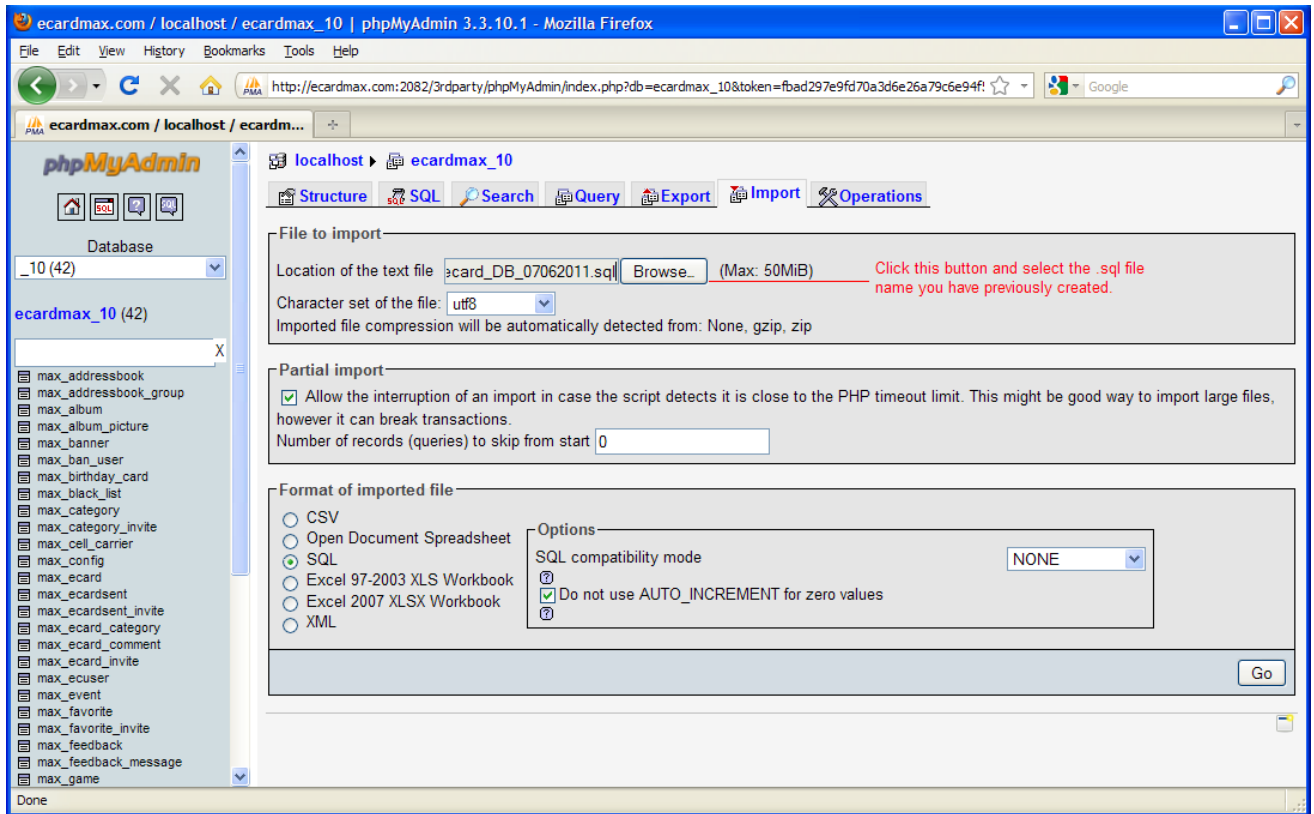

How to Restore Database with phpMyAdmin

To restore database with phpMyAdmin, just follow the simple steps below.

- 1) Launch phpMyAdmin and select the database you want to restore. The screen below shows phpMyAdmin with ecardmax_10 database selected.

- 2) Click Import link from the above screen which will take you to the Import screen below.

- 3) Follow the red color instruction on the screen above then click Go. This will import (restore) your database. After completion, you will see the screen below.
